## Cluster Analysis

This is a graph of the percentage of players from each draft class who are active. To make the process of choosing cutoffs for groups to model easier, we will use K-means clustering on these percentages and decide which number of groups is the most appropriate.

Five Groups	Four Groups	Three Groups	Two Groups
Group 1: 1995-2005	Group 1: 1995-2005	Group 1: 1995-2007	Group 1: 1995-2010
